Genetic Consultation Services

Recipient Screening for Recessive Conditions

Match to Donor Extended Carrier Screening Panels

We offer an inclusive comprehensive package for testing individuals and couples wishing to know their genetic carrier status as part of their family planning.

In accordance with professional guidelines there are a number of recommended steps involved in offering genetic testing to patients that may have implications for them and their wider families.

The screening is designed to match the genetic testing panel used to screen sperm/egg donors.

The Extended Carrier Screening Package includes

- Donor risk Assessment (2 x positively screened donors) options and pre test information (available separately to package)
- Informed consent
- Test requisition
- Pre-Release results review
- Post test genetic counselling
  - Results review
  - Options review
  - Ongoing support
- Personalised consultation letter and results provided.
- Personalised letters for extended family members as required
